Subject: STA Requests for KLHT(AM) & KHKA(AM)

Mr. Manarchuk,

Per our phone conversation, here is the justification for the requested STA for the above stations, which is missing from the CDBS.

Both stations are licensed to Honolulu, HI, and operate from a common antenna tower.

Honolulu Transit is constructing a commuter rail line within 100 meters of the KLHT/KHKA tower.

The licensees request STA to operate at reduced power in coordination with the transit project's contractors to protect worker safety when cranes are in operation, or as otherwise needed.

The predicted duration of this project is approximately three years.
